

Oct. 24, 2019 Minutes
EP 413 3:30-4:30pm

Sean, Loren, Yaser, Steven, Dr. Dan present.

Relaid to Dr. Dan what we learned about forces needed to destroy a bale of material.

Biggest take away is that orientation has a huge effect on forces.

Bales are cheaper than expected. That is great for us that way we can test prototype to refine the design of the machine.

Tasks were assigned as follows:

Steven - Video into data

Loren - Readily available teeth

Sean - Design validation plan

Yaser - Presentation Template

Meeting Sunday Oct. 27, 2019 library 2nd floor at 1pm to build presentation.
